#### Weekly Course Subjects:

WEEKS	TOPICS TO BE DISCUSSED-PROCESSED
Week 1	Current Health System and Organization
Week 2	Nursing Process and Data Collection
Week 3	Physiological Changes and Psychosocial Issues in Aging
Week 4	Home Care
Week 5	Patient Care in Terminal Period
Week 6	Stress and Disease
Week 7	Feeding Ways in Patients Who Cannot Take Orally (Parenteral and enteral nutrition)
Week 8	Team work in nursing- <b>MIDTERM</b>
Week 9	Quality of Life in Chronic Diseases
Week 10	Diabetes Mellitus
Week 11	Joint and connective tissue diseases
Week 12	Pulmonary system diseases
Week 13	Patient Care in Terminal Period
Week 14	Quality of Life in Chronic Diseases,
Week 15	<b>FINAL</b>

#### Student Workload Table

Activities	Number	Time	Total Workload
Lesson	14	2	28
Laboratory			
Application			
Field Study			
Study Hours Out of Class (Freestudy / Group Work / Preliminary Work)	14	5	70
Presentation (Making videos / Preparing a poster / Oral presentation / Focus Group Meeting / Survey Application / Observation and Report Writing)	2	16	32
Preparing a Seminar			
Project			
Case Study			
Role Playing, Dramatizing			
Writing an article-Critical			
<b>Mid-term exams</b>	1	10	10
<b>Final exams</b>	1	10	10
<b>Total workload (hours) / 25 (s)</b>	150/25=6		
<b>Course ECTS</b>	<b>6</b>		

**Evaluation System**

<b>Semester Studies</b>	<b>Number</b>	<b>Contribution</b>
Midterm	1	%50
Quiz		
Laboratory		
Application		
Field Study		
Course-Specific Internship (If any)		
Homeworks		
Presentation and Seminar		
Projects		
Other		
<b>Total of semester studies</b>	1	%50
<b>End of semester studies</b>		
Final	1	%50
Homework		
Application		
Laboratory		
<b>Total of end of semester studies</b>	1	%50
Contribution of Semester Studies to Success Grade		%50
Contribution of Final Exam to Success Grade		%50
<b>Total of success grade</b>		%100

<b>Linking Course Learning Out comes and Program Competencies</b>						
	<b>Program Qualifications</b>	<b>Learning outcomes</b>				
		<b>L.O.1</b>	<b>L.O.2</b>	<b>L.O.3</b>	<b>L.O.4</b>	<b>L.O.5</b>
1.	To be able to develop and deepen their knowledge at the level of expertise,	5	5	5	5	5
2.	To be able to transform theoretical and practical knowledge at the level of expertise into behavior			5		
3.	To be able to create new information by integrating knowledge in the field of expertise within formation from different disciplines.					5
4.	To be able to solve problems that require expertise by using scientific research methods	5			5	
5.	To be able to develop new strategic approaches and produce solutions by taking responsibility in unforeseen complex situations encountered in applications in the field of expertise.					
6.	To be able to transfer current developments and own studies in the field of expertise to groups in and out of the field systematically by written, oral and visual means.					5
7.	To be able to use information and communication technologies at an advanced level with computer software at the level required by the field of expertise and to be able to translate in English.				5	
8.	To be able to develop application plans on the subjects related to the field of expertise and evaluate the results obtained within the framework of quality processes,	5	5			
9.	To be able to share these values by considering the social, scientific and ethical values in the stages of collecting, interpreting and announcing the data related to the field of expertise.			5		5
<b>Contribution to the level of proficiency: 1. Lowest, 2. Low / Medium, 3. Average, 4.High, 5. Excellent</b>
